What Are Regulatory Capital Relief Transactions?

Diversified Pools of Performing Collateral

- Performing loans and revolving lines of credit extended to investment grade and near investment grade borrowers
- Collateral is originated with the intention to be held on the balance sheet as part of the issuing bank's core lending book
- Geographic, sector, and individual borrower diversification enforced by transaction guidelines

Structural Alignment with Issuing Banks

- Issuers retain material exposure to underlying collateral through the transaction structure
- Banks are incentivized to maintain underwriting discipline in an effort to minimize defaults and, if defaults occur, maximize recoveries
- Investors benefit from the issuing bank's borrower relationships as well as their underwriting, monitoring, and workout resources

Income-Driven Returns with Low Correlation

- Performance primarily driven by income from floating-rate coupons
- Historical returns characterized by resilience during periods of market and/or macroeconomic stress
- Low historical correlation to most traditional and alternative asset classes

Effective Tool for Large, Global Bank Issuers

- Transactions are a core balance sheet optimization tool and complement other efforts to optimize capital levels, reduce balance sheet concentrations, manage lending capacity, and respond to regulatory and/or accounting changes
- Enable banks to maintain core lending activities that are often prerequisites to gaining investment and commercial banking business
- Benefits reinforced by issuance growth and issuer expansion across the U.K., Europe, Canada, U.S., and Asia

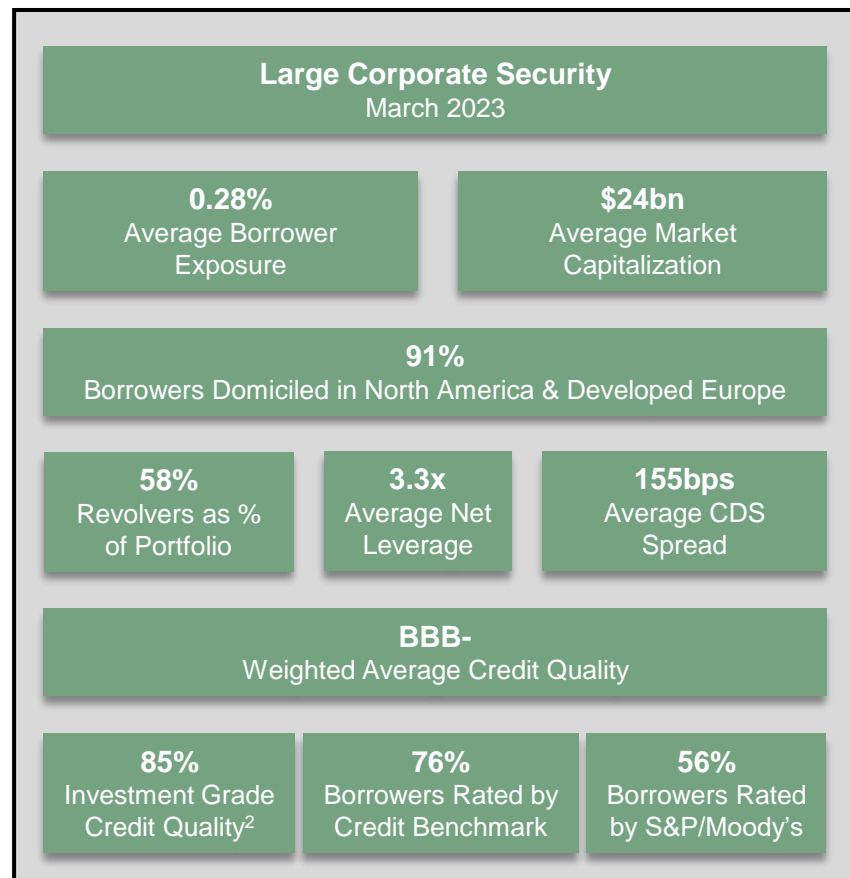

Past performance is no guarantee of future results. Diversification does not eliminate the risk of experiencing investment loss. Please review the "Certain Risk Factors" and "Potential Conflicts of Interest" sections in the Partnership's Memorandum for a more complete description of the risks and conflicts of interest associated with investing in the Partnership.

Regulatory Capital Relief securities offer investors a diversified pool of performing collateral with strong credit quality
